ITINERARAY

Airport – Sigiriya	
	Meeting and Greeting at the Airport by Yana Travels representative. Transfer from Airport to Hotel in Sigiriya via Munneswaram <u>Munneswaram Temple</u> The Munneswaram Kovil close to Chilaw is one of the 5 major Shiva temples of Sri Lanka and Rameswaram islands. They are called Ishvarams. According to a Tamil legend, the temple is situated at a place where King Rama prayed to Shiva after committing the worst crime according to Hindu Dharma, namely Brahmahasti, the killing of a priest, because Ravana who had to be killed by Rama in order to liberate Sita, was of Brahmin caste. Rama stopped the Vimana vehicle at Munneswaram because of his feeling that the Doshana sin was not following him at this place. So he ascended from the vimana and prayed to God Shiva asking for a remedy. Shiva advised Rama to install four lingams at Manavari, Trinco, Mannar and Rameswaram for this purpose. <u>Manavari Temple</u> Manavari, about 6 kms north of Chilaw, is the first place where Lord Rama installed a Lingam, as a remedy to Lord Shiva after committing Brahminicide by killing the King Ravana who was a Brahmin. This Shiva Lingam in Manavari is called Ramalingam because it was made by Lord Rama. There are only two Lingams in the world named after Lord Rama, the other is in Rameswaram in India. The largest island is known as "Ma Doowa" is the largest inhabited island within the country where about 300 families live. The smallest islet of the lot is called "Satha Paha Doowa" where there is a tiny shrine with a statue built in respect of the gods of Kataragama. <u>Turtle Hatchery</u> <u>Kosgoda Sea Turtle Conservation Project ("KSTCP")</u> Dudley Perera's project has been underway since 1988. The main aim of the project is to monitor local sea turtle activity and conserve the local nesting sites. We aim to make the public more aware of how endangered these beautiful creatures are and just how important it is to help protect them before it is too late. One of the most important activities of the project is its hatchery. Within the sanctuary of the project, collected and rescued eggs can hatch safely away from predators before being released into the sea at night-time. In addition, a certain number from each hatching are kept back for a short period for 'head starting' before release. The hatchery program is designed to maximize the number of hatchlings reaching the sea and surviving through the critical stages of their early life. Only a few hatchlings from each batch will ever make it to adulthood. Therefore every nest-ground, every egg, every hatchling and every turtle is crucial to the survival of the species. Unfortunately, sea turtles face many dangers Transfer from Bentota to Colombo City Tour at Colombo <u>Panchamuga Anjaneyar Temple</u> This Temple in Sri Lanka which dedicated to Lord Hanuman in his Panchamuga form, meaning five faces.
